Summary

Full-stack software engineer (SDE II) with 3+ years at Owlbyte shipping AI-powered products and real-time data systems. Builds across FastAPI, Next.js/TypeScript, MySQL, Redis and AWS, with a strong focus on agentic AI, LLM-driven outreach and encrypted messaging.

Education

B.Tech. – Indian Institute of Technology Kanpur *Nov 2020 – April 2024*
Major in Materials Science and Engineering, Minor in Machine Learning and Applications

Skills

Languages & Frameworks: TypeScript, JavaScript, Python, SQL, React, Next.js, Node.js, Express.js, FastAPI, SSE, Chrome Extensions
Data & Cloud: MySQL, PostgreSQL (pgvector), Redis, MongoDB, Neo4j, Tinybird, Supabase, AWS (Lambda, RDS, EC2, S3), Airflow
AI, Tooling & DevOps: LLM agents, MCP, Claude, Gemini, OpenAI Codex, Clerk, GitHub Actions CI/CD, pre-commit hooks, Docker, PM2

Experience

Owlbyte, Software Development Engineer II *(promoted from Software Developer)* *May 2024 – Present*

Dopamyn | *AI-powered growth & outreach platform for X*

- Built the **Auto-DM engine** on **FastAPI and MySQL workers** that has sent **25K+ DMs** for **270+ customers**, earning **1,300+ replies**
- Created an **LLM agent** that drafts DMs in each sender's own style; it wrote **58% of all DMs sent**, and users kept **70% of its drafts**
- Integrated X's **encrypted Chat API** via its **WASM SDK in Next.js**, recovering campaign replies the old DM API could no longer see
- Shipped **team workspaces on Clerk Organizations** with role-based permissions and audit logs, enabling multi-seat team plans
- Owned support for **20+ paying clients** in shared groups, resolving every bug and feature request and joining client feedback calls

AskRoger | *Real-time social intelligence dashboard*

- Developed a real-time dashboard streaming **cashtag metrics** over **WebSockets**, reaching **50K+ visits** and **3,000+ active users**
- Added **tier-based access control** and integrated a **crypto payment gateway** for subscriptions, now serving **200+ paying users**

Graph Intelligence Engine | *Internal tool for social influence & narrative mapping*

- Built an automated **Neo4j** graph mapping **50K+ X accounts** to **5K+ tokens** across **2M+ relationships**, updated daily via **cron jobs**
- Developed a **MySQL-to-Neo4j data pipeline** and REST API on **AWS Lambda and API Gateway** for real-time relationship analysis

X-Alpha Chrome Extension | *Turns X feeds into AI-powered crypto trading signals*

- Shipped a **React** extension adding price and sentiment charts to social feeds, with **5,000+ downloads** and **4,000+ active users**
- Designed interactive visualizations with **Lightweight Charts and D3**, correlating token price moves with social media mentions

Owlbyte, Backend Engineer & Data Analyst *(Pre-Placement Offer)* *May 2023 – April 2024*

- Profiled **100M+ Ethereum wallets** via on-chain network analysis to characterize clusters and identify profitable trading behavior
- Engineered a real-time **data pipeline** on **AWS Timestream, RDS, Redshift and Lambda**, orchestrated by **Airflow** to power alerts
- Created dashboards that correlate on-chain transaction flows with market moves to simplify crypto trends and risk assessments

Techavtar, Associate Product Manager *May 2022 – July 2022*

- Digitized an offline bidding process into an online tender platform, lifting **tender volume by 50%** without losing existing revenue
- Streamlined operations by digitizing manual workflows, contributing to a **30% revenue increase** and a lighter team workload

Project

YouTube Ad Intelligence Engine | Agentic AI browser extension

- Built a **React (WXT)** browser extension that triggers and displays AI-driven analysis of YouTube ads, keyed by **extracted video IDs**
- Orchestrated an **agentic workflow** with self-hosted **n8n (Docker)** and AI agents to analyze each ad's transcript for transparency
- Cached AI analysis results in **Supabase storage**, so previously processed videos load instantly without re-running the pipeline
